Filesystem Internals - Assignment

Zilogic Systems

1. Using Ramdisk and USB Mass Storage

1. Create a filesystem on the ramdisk `/dev/ram0`.
2. Mount the filesystem.
3. Create files in the filesystem.
4. Unmount and remount the filesystem. Check if the files are present.
5. Reboot the system and mount the ramdisk. Check if the files are present.

Repeat the above using the USB Mass Storage device.
